Clear and transparent colours

This warranty in favour of the buyer integrates the applicable articles of the Swiss Obligations Code and of the General Conditions of Sales insofar as they do not contravene the following warranty conditions.

1) WARRANTY PERIOD

The product is guaranteed by POLITEC SA for a 10 (ten) year period as from the delivery date.

2) LIMITED AREAS

The warranty applies only for products sold and installed in European countries.

3) LIGHT TRANSMISSION AND YELLOWNESS

During the warranty period the multi-wall products Politec having a minimum thickness of 8 (eight) mm, Solid Sky having a minimum thickness of 2 (two) mm and Politec WT having a minimum thickness of 0,8 (zero point eight) mm will maintain a high degree of light transmission.

- a) In comparison with the original value the loss of light transmission measured according to the norm ASTM D 1003 will not be higher than:
- 3 (three) % during the first 2 (two) years and then 7 (seven) % within the total 10 year period, for the clear products
 - 6 (six) % during the first 2 (two) years and then 12 (twelve) % within the total 10 year period, for the transparent coloured products
- b) The yellowness index of the product, measured according to the norm ASTM D 1925, will not vary over:
- 8 (eight) Delta during the first 2 (two) years and of 10 (ten) Delta within the total 10 (ten) year period in comparison with the original value, for the clear products.
 - 10 (ten) Delta during the first 2 (two) years, years and of 14 (fourteen) Delta within the total 10 (ten) year period in comparison with the original value, for the transparent coloured products.

The characteristics mentioned at 3a) and 3b) must be measured on a clean, scratch free and correctly handled product.

4) HAIL BREAKAGE

During the warranty 10 (ten) year period the multi-wall products Politec having a minimum thickness of 8 (eight) mm, Solid Sky having a minimum thickness of 2 (two) mm and Politec WT having a minimum thickness of 0,8 (zero point eight) mm will not be subjected to "breakage by hail". "Breakage by hail" applies if the external wall of the product presents holes caused by hail in a uniform and repetitive way. This guarantee against hail breakage is dependent on the execution of a simulated impact test made with artificial standard polyamide stones of 20 mm diameter shot against the products at a 21 m/s speed. Should this test not cause evident breaks in the external wall, so the claim will be refused.

5) WARRANTY PERFORMANCE

POLITEC SA engage themselves, within the warranty validity period, at their own unappealable decision, to supply

the buyer free of charge with the quantity of product not corresponding to the characteristics defined herein or to reimburse the original purchase price indicated on the sale documents at 100 % in the first 2 (two) years and for the further 8 (eight) years at 1/120 of the original value for each month remaining until the expiration of the 10 (ten) year period. Any further request is excluded, particularly the possibility for the buyer to require the rescission of the contract. Any further cost reimbursement is expressly excluded, such as: transport, installation, re-installation, disassembly, or other costs.

6) WARRANTY APPLICATION

The warranty comes into effect only if:

- a) The end user has sent the written request of application to POLITEC SA:
- within 8 (eight) days as from the date of occurrence of the damage
 - enclosing a copy of the purchase document (invoice)
 - with a clear description of the damage occurred
 - with his authorisation for an inspection at the installation place by POLITEC SA or by a third party authorized by POLITEC SA.
- b) The products were forwarded, handled, stocked, processed and installed in normal conditions in observance of all the technical instructions issued by POLITEC SA for each product.

7) WARRANTY EXCLUSIONS

Any warranty is excluded for damages due to "unsuitable uses" of the product. As examples -but not limited to them- "unsuitable uses" are meant as uses for which the following conditions were not observed:

- Use of cold bended multi-wall sheets with a thickness over 8 (eight) mm and of cold bended sheets Solid Sky with a thickness over 2 (two) mm
- The product must be protected against noxious chemical agents
- The product must be free of scratches and/or spots and/or inclusions
- The jointing or fixing elements, accessories, adhesive tapes and sealants must be compatible with the product and used in order to avoid any damage to the product
- The products must not be exposed to sources of heat or be thermoformed
- The U.V. protected side must be installed exposed towards outside
- The cold bending radius of the products must correspond to the technical instructions of POLITEC SA

8) EXCLUSIVE COURT: seat of POLITEC SA

POLITEC SA reserves in any case the right of convening the buyer before any other competent court.

9) APPLICABLE RIGHT

The contract is subject to the Swiss laws with exception of the Viennese Convention dated April 11th, 1980 the application of which is excluded.

ANY FURTHER CLAIM FOR ANY DIRECT OR INDIRECT DAMAGE OR LOSS IS EXPRESSLY EXCLUDED FROM THIS WARRANTY.
